

ERRATA

The Commission's report at page 24 provides estimates of the monthly bill impact of 1-mil systems benefits charge. The column labeled as "SBC/month" is incorrect. The column incorrectly shows the impact of a monthly 3-mil SBC charge. The correct costs associated with a 1-mil SBC are \$0.75, \$12.50, and \$200 per month for a typical residential, commercial or industrial customer respectively. All other estimates are correct, including the percentage impacts.
